

Peach

Puree

Mastfoods implements state-of-the-art processing techniques to ensure that its Peach puree is the closest to true fruit taste as possible. This extra effort translates into the superior products that our customers have come to expect.

Mastfoods peach puree is extremely rich in vitamin A and potassium, apart from abounding in a number of other nutrients. Our peach puree is also rich in calcium, phosphorus, potassium, magnesium and Vitamins E, vitamin K, thiamin, riboflavin, niacin, pantothenic acid and selenium.

Our Peaches puree are carefully processed from fresh, ripened peaches to provide the essential flavor, color and nutrition, in a convenient, ready to use ingredient form for processed beverage and food applications.
